

Dear Sir/Madam,

Hearing loss is the 3rd most health condition, affecting 4 in every 1000 children born, 9-10 in every 1000 school-going children, and over 6% of adults over 50 years affects permanent hearing loss. The good news is 60% of childhood hearing loss is preventable.

Society to Aid the Hearing Impaired (SAHI) is a 15 years old NGO with the motto to "Let all hear" is on a mission to create a deaf-free Andhra Pradesh. We believe that every child should be given equal opportunity and no disability should stand in its way to achieve success. Over the years, we have conducted 160+ camps, screened more than 25,000 children, conducted, 1873 free micro ear surgeries, distributed 1945+ digital hearing aids, and financially helped more than 430 children get cochlear implants.

We are primarily a group of doctors, audiologists, rehab specialists, and social workers who have come together to ensure that all hearing-impaired children get to hear - either with a hearing aid or cochlear implant.

To further our mission we are on the path to establishing India's First Center of Excellence (CoE)- on par with other international organizations of repute in one-acre land at Vizag Medtech zone. It is a state-of-the-art, latest tech-enabled, first in India center of excellence, in Andhra Pradesh. This center will work with GoAP to create a Deaf Free Andhra Pradesh. We aspire to be the role model for hearing health care services that will be available to the lowest strata of society.

The COE would focus on providing training, best practices, and resources for different teams working in the hearing care services, while also gathering the data and learnings from all of the centers across India. It will be the first of its kind in India with the State of the Art Model Diagnostic and Rehab Department. The Centre will have adequate space for housing the latest diagnostic equipment which is patient-friendly.

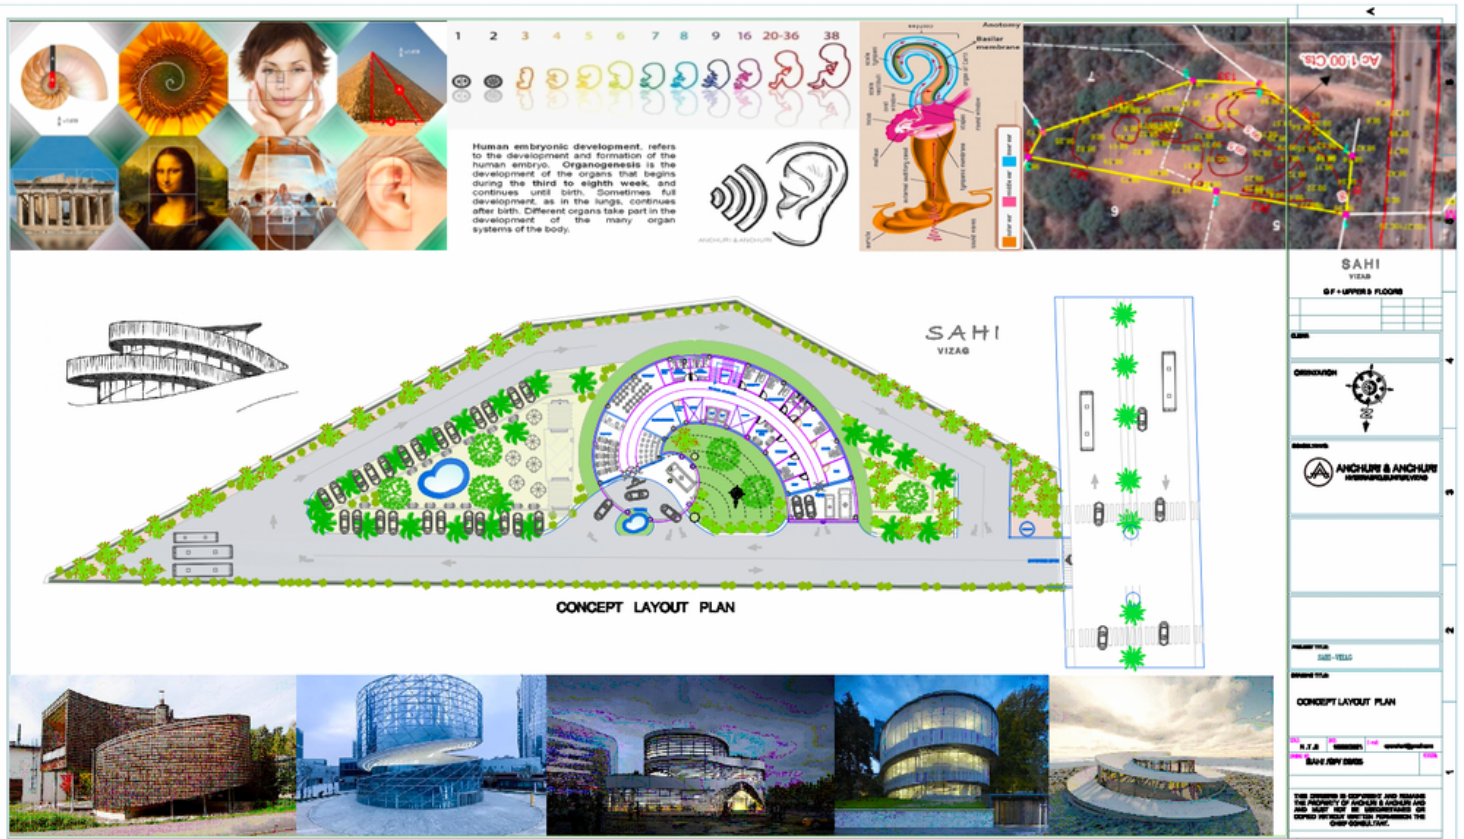

Hear The World Foundation, a Swiss-based NGO is joining us in achieving our goals by providing State of the art latest equipment and Free hearing aids for the next three years. Cochlear Implant companies will provide us with periodic Training Programs in the COE facility.

To expand our program and to help Construction and Operation of COE in Vizag city, we request you to make a valuable monetary contribution to the SAHI organization as part of your company's CSR activity. We are recognized under tax laws- with 80G certification and Corporate CSR fund certification.

Together, we will build a state-of-the-art Centre of Excellence

when we bring together the passion and commitment of our donors, we push the boundaries of what is possible to make a difference in the lives of children.

To build a CoE, we need Rs. 15 Crores in donations.

With the support of our generous donors, we have started our journey to our goal—but we can't break ground without you. Together, we will build a state-of-the-art Centre and a Patient Support Centre behind it that will house our child health leaders.

The above architecture would be focused on green eco-friendly construction while exploiting the topography of the land parcel with a unique building in the shape of Fibonacci spiral representing human inner ear cochlea.

Your support will help us in the following areas:

RRe-Imagine Our Campus

We need buildings that lift—not limit—our ability to care for patients. It is a state of the art, high tech enabled, Center of Excellence , first in India, in Andhra Pradesh. This center will work with GoAP to create a Deaf Free Andhra Pradesh. We will be the role model for hearing health care services.

We will construct a state-of-the-art Ear Care Centre and patient support building to accommodate the best that facility and Set up the state of the Art Model Diagnostic and Rehab Department with Hear the World foundation, matching our world-class expertise with the best clinical spaces for patients. The center will be equipped the latest diagnostic equipments which includes - The Diagnostic set up will have: Audiometry with free field testing, VRA, BOA, Immittance, BERA and OAE, PTA, Diagnostic Audiometer

Continue Breakthrough Research

With your help, we will make more discoveries from the lab bench to the bedside. Investing in science will help speed our ability to take leading research and turn it into groundbreaking treatments and cures to eliminate deafness . Through clinical trials, support for research and funding for our scientists, we will transform the way we do medicine, to make a bigger impact on patients, sooner.

Partner for Better Care

Seamless health care means no cracks to fall through. Our investments will expand initiatives that build capacity both at home and across the globe —delivering sustainable health care worldwide, ensuring children can receive the integrated care they need no matter where they live.

Sustainable development and growth

Manpower and the Operational costs will be borne by SAHI. With Digitally enhanced operations, the center will provide direct employment of 50 people which includes administration staff, Secretarial staff, Audiologists, Therapists and Surgeons.

The entire project will be run on the donations we receive. The first of its kind CoE will provide free services to all the beneficiaries. To carry forward our ambitious projects, to make our country a better place, we request you to help us financially. Any amount of monetary donations is welcome and we will be highly honored and obliged for the support you have offered.

Best,

Dr.E.C.Vinaya Kumar
